WALL HUNG Frames & Flush Activators ■ GEBERIT

Unpleasant odours in the toilet will be a thing of the past

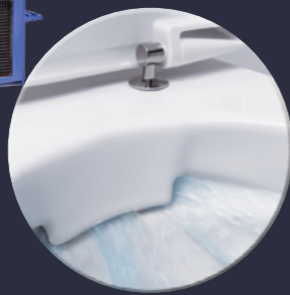

The Geberit DuoFresh module removes the bad air directly from the WC ceramic appliance, purifies it using a ceramic honeycomb filter and then returns it to the room. Thanks to a proximity sensor, the odour extraction unit always switches on automatically as soon as someone sits down on the toilet.

- The ceramic comb filter and insert for in-cistern sticks are within easy reach located behind the flush plate. Purifying the air thoroughly.
- It also guides the in-cistern block down a chute to a fixed position below the surface of the water in the cistern. Once there, the block dissolves slowly and ensures hygiene and cleanliness in every flush.
- An additional benefit offers a built-in LED orientation light. Just below the flush plate.
- The optional insert is suitable for most Geberit flush plates in the Rectangular and Round ranges and can be installed by a plumber at a later date.

LED Orientation Light

Ceramic Comb Filter & Insert for Cistern Sticks

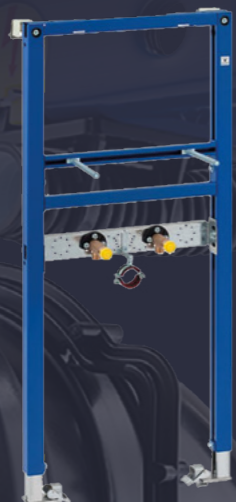

Wall-hung Frames

- A comprehensive range with universal and self-supporting installation elements.
- Available in drywall construction for all sanitary appliances including W/C, washbasins and urinals.
- The wall-hung frames are suitable for partition wall installations, in-wall installations in stud-walls.
- Lightweight construction and part-height / room-height prewall installations.
- Can be used in new buildings and renovations.

WCBUTG

change the LED color to match your décor or match your mood

A magical glow

Approach the toilet. Suddenly, silently, two bars of pure light appear where a moment before only a seamless glass surface had been. Pass your hand over the large bar for full flush or the small bar for half flush.

A color to match your mood

The award-winning Geberit Sigma80 is a touchless flush plate offering five user-selectable colors for the dual-flush LED bars. Includes a temporary shutoff mode to prevent flushing during cleaning. It can even be set for an automatic flush that activates as the user walks away.

- Suitable for private or semi-public applications
- Glass plate can be locked in place for tamper resistance
- Adjustable interval and auto-flush options
- Dual-flush built in
- LED lighting in five user-selectable colors
- 3-year end customer warranty for delivery of replacement parts

Commercial Brassware

NON-CONCUSSIVE

◆ Non concussive taps work by pushing down on the top of the tap to start the water flow for a specified length of time. The top of the tap is self closing which means it slowly works its way back up to its original position and switches off the water flow once a set time limit is reached making them ideal for use in commercial washroom environments.

CBAF

WATER MANAGEMENT

◆ Water management is important especially in public areas where multiple water outlets are used, Timed Flow Control for Duct Mounting is suitable for duct mounting Features an economic 60 second time delay which allows adequate showering time whilst managing water use. Suitable for low water pressure systems.

INFRA-RED

Infrared, automatic basin mixer tap. Non-touch activation offer reliable and hygienic water saving solutions

◆ Simply place your hands under the spout to activate the water flow and remove to stop – there's no need to touch it except to clean. This basin mixer tap is finished in smart polished chrome with a solid brass body for durability
