- Cool white
- Warm white

**Switchable Dimmable LED IP65 Fire Rated Downlight**

Fully dimmable from most standard wall dimmers, and also includes the power converter. The light output is equivalent to a 50W GU10 halogen lamp, but due to the latest LED technology it uses 85% less energy, helping to save money and the environment.

LEEP

**The new wireless Kinetic Switching system** allows you to turn on your kitchen, bedroom or bathroom lighting in three different ways:

- Manually by using the Switch
- Smart Phone or Tablet
- Alexa or Google Home.

Easy to install anywhere in the home using screws or adhesive pads (supplied), and onto a variety of smooth surfaces such as glass, marble and tiles. No wiring or batteries eliminates the need for installing back boxes, channelling walls or adjusting decor.

**Height Adjustable Pendant Lights**

this stunning pendant light will fill your bathroom with radiance. The versatile design means it can be placed virtually anywhere in your bathroom, while the sleek chrome finish makes it a stunning feature.

LEER

**Flexible Waterproof & Dimmable Neon LED Strip Light available in a huge variety of lengths (from 1-50m)**

Flexible IP65 Waterproof Dimmable Neon LED Strip Light 220 – 240V 9W/m has a translucent High quality Silicone cover that offers uniform light and performs better than the standard Strip lights with visible individual LED Chips.

Because it's so flexible, its installation is simple and doesn't require any specific tools, allowing it to be adapted to all sorts of corners, logos, signs, etc. The waterproof feature of the Light makes it ideal for Indoor and Outdoor use.

**Mini PIR Sensor and Plinth Light Kit**

- Detector will switch on the connected lights when it senses the motion of a body
- Switches off with adjustable time delay 10 sec to 3mins
- Detector range up to 2.5m
- I/P and O/P wiring required

LEEH

The following guide will help you ensure that you select the correct lights for your bathroom and in the correct location

When thinking about lighting for your bathroom it is important to consider the **Bathroom Zones** below, using these guidelines will ensure the lighting you want can be installed in your desired location.

**Zone 0** is inside the bath or shower itself. Any fitting used in this zone must be low voltage, (max 12v) and be rated at least IP67 which is totally immersion proof.

**Zone 1** is the area above the bath or shower to a height of 2.25m from the floor. In this zone a minimum rating of IP45 is required.

**Zone 2** is an area stretching 0.6m outside the perimeter of the bath and to a height of 2.25m from the floor. In this zone an IP rating of at least IP44 is required.

**Outside Zones** are anywhere outside zones 0, 1 and 2 (subject to specific limits) and where no water jet is likely to be used. We suggest that you consider a light with an IP rating of at least IP20+.
